Zobacz, kto „okupował” naszą szopę!

Wygląda na to, że powitaliśmy nowe osoby w rodzinie Holly Grove.

Te kochane jeże zostały odkryte w przytulnie ułożonych miejscach i uznawały naszą szopę za swój dom.

**SUPER!**

Ogromne brawa dla Mackenzie za zdobycie ponad 60 odznak w Beavers i koszenie otrzymało brązową nagrodę!

Cóż za fantastyczne osiągnięcie!

W zeszłym tygodniu klasy Laury i Samanty świetnie się bawiły w The Space Center w ramach swojej wycieczki na koniec roku. Nie zabrakło dobrej zabawy, pełnej uśmiechu i śmiechu.

## Keep water beads away from young children

Children love water beads. But it's really dangerous if a young child swallows them.

They expand in the belly and can block the bowel. Some grow as big as golf balls.

A child may need major surgery to remove them. So please keep them away from young children.

If you suspect a child has swallowed a water bead, get medical help straight away.

## Button batteries can badly hurt or kill a small child if they swallow one

### Look

Hunt around your home for button batteries. Think toys, lights, remote controls and more.

### Check

Check for products with loose backs and button batteries that have dropped out.

### Store

Keep button batteries in a safe place, up high and out of your child's reach.

### Dispose

Recycle used button batteries as soon as you can. They are still unsafe.

### Act

If you think your child may have swallowed a button battery, go straight to A&E or call an ambulance.

## Button batteries – where are yours?

BIPBA  
British Invention Portable Battery Association

Button batteries, particularly big, powerful lithium coin cell batteries, can badly hurt or kill a small child within two hours, if they get stuck in the food pipe. Know where yours are, so you can keep your children safe.

### Five top tips

- Hunt around your home for button batteries – in products as well as spare and 'flat' batteries.
- Keep products well out of children's reach if the battery compartment isn't secured.
- Store spare button batteries in sealed containers in a high cupboard.
- Remember that 'flat' or 'dead' batteries still hold enough power to badly hurt a child. So put them out of children's reach straight away and recycle them safely and as quickly as possible.
- If you think your child has swallowed one, don't delay. Trust your instincts and take them to A&E straight away or call 999 for an ambulance. Don't let them eat or drink and don't make them sick.

## Magnets can rip a hole in your child's gut!

- Super strong magnets, like these, can cause serious damage to your child's insides if they swallow them.

- They can join together and make holes in their gut. Removal can be difficult and need complex surgery.

- They can be in toys, jewellery, fridge magnets or cheap products bought from online marketplaces. They can be 10 times stronger than is safe.

⚠️ If your child may have swallowed magnets, don't delay! ⚠️  
Call 999 for an ambulance or go straight to A&E. Symptoms can seem like a stomach bug or appendicitis.

## Trigger times

Teach your child to leave your dog alone when they are:

- Sleeping - no-one likes to be woken up suddenly.
- Eating or having a treat - they might think you're going to take their food.
- Have a toy or something else they really like - they might not want to share!

# When you cross the road remember:

## THINK

Find the safest place to cross. Where possible, use a pedestrian crossing.

## STOP

Stand on the pavement near the kerb and make sure that you can see the traffic.

## LOOK AND LISTEN

Look all around you for traffic and be sure to listen carefully for things you can't see.

## WAIT

Wait until it's safe to cross. If traffic is coming, let it pass. If you're not sure, don't cross.

## LOOK AND LISTEN AGAIN

When it is safe, walk straight across the road. Don't run. Keep looking and listening.
